Sunvale Energy Systems Company Profile

SES-PRO-001 | Version 1.0 | As of 2026-10-15 | Fictional company test fixture

Sunvale Energy Systems designs and installs commercial solar and battery systems. The company operates from Abuja and supports commissioned sites in Abuja and Kaduna. Its October focus is Project Lumen, a three site installation programme with an unresolved battery delivery dependency.

Employees as of 2026-10-15	34
Managing Director	Chika Nwosu
Programme Director	Mariam Okeke
Engineering Lead	Ibrahim Sani
Programme contact	mariam.okeke@sunvale.example

Customers and delivery model

The company serves commercial offices, schools, and light manufacturing sites. Engineering prepares the design, procurement confirms equipment, and the commissioning team records completion. Routine monitoring is offered under separate maintenance agreements.

Project Lumen

Ibrahim Sani owns Project Lumen. The approved budget is NGN 64,000,000 and the programme target is 2026-12-04. The three sites are SES-SITE-A, SES-SITE-B, and SES-SITE-C. A site is not complete until the commissioning checklist is signed and the customer accepts handover.

Supplier relationships

Voltcrest Storage supplies the battery assemblies under SES-PO-221. Sunvale has asked KoraBridge Logistics for a transport quotation; no transport contract or shipment booking has been accepted as of 2026-10-15. A quotation request should not be described as an active supplier agreement.

Document authority

SES-OPS-002 sets internal project change controls. SES-RPT-003 reports progress and equipment dependencies as of 2026-10-15. No bank account information, tax identification number, or technical operating instructions are supplied in this fixture.
