Cedargrain Foods Company Profile

CGF-PRO-001 | Version 1.0 | As of 2026-10-15 | Fictional company test fixture

Cedargrain Foods produces packaged grain blends and dry breakfast mixes for wholesale customers. It operates one production site in Ibadan and uses KoraBridge Logistics for sealed dry goods distribution. Its October priority is packaging availability and resolution of one isolated quality hold.

Products and customers

The product range includes CGF-P-10 Millet Breakfast Mix and CGF-P-20 Sorghum Grain Blend. The company supplies business wholesalers and institutional buyers. Product quantities in the October production report refer to finished retail packs, not kilograms.

Distribution relationship

KoraBridge Logistics handles sealed dry goods under service reference KBL-CGF-2026. Cedargrain is the customer in that agreement. An order for 400 outer cartons appears in the logistics company's KBL-SO-101 record. This packaging count must not be treated as the number of retail food packs produced.

Project Orchard

Femi Oladele owns the packaging line improvement project Orchard. Its approved budget is NGN 12,500,000 and its completion target is 2026-11-13. Quality Manager Bisi Adeyemi controls product release; the project owner cannot release a held lot by changing the project schedule.

Document authority

CGF-OPS-002 defines the fictional company's internal lot hold process. CGF-RPT-003 reports lot status, units, and customer allocations as of 2026-10-15. These records describe a test business process and are not food safety guidance.
